BioBlood 500

BioBlood BR500. Drawers are optional extras.

The **BioBlood 500** design is customised to meet the special requirements associated with the controlled storage of blood, plasma and blood–related products.

These advanced cabinets have been developed exclusively for blood storage in order to help ensure high, consistent quality at every stage from donor to transfusion. This means uniquely stringent specifications of all the components.

BioBlood cabinets also provide users with an excellent view of the contents. A glass door lets you see at a glance what is inside the cabinet, making checking and access both quicker and easier.

The **BioBlood 500** utilises environmentally responsible HFC-free foam propellants and is available with HFC-free refrigerants.

The BioBlood 500 is available as a refrigerator or freezer in either white or stainless steel finish. All BioBlood models come with selfclosing door. Glassdoor is available for refrigerator.

Exclusively for markets outside the european union. Version 03. Valid from 01.01.23

Biostorage you can depend on

BioBlood 500

Top panel with BioBlood control unit

The MPC unit is specially developed for users of storage cabinets in the BioBlood range. Among its many features are acoustic temperature and door alarms, and a voltage-free contact (NO/NC) for remote alarms. The display can be locked.

24.5 mm port for ease of access, e.g. sensors for external temperature surveillance.

E-sensor

Extra sensor and reference container for providing a temperature reference within the storage compartment.

Shelves and drawers

A wide range of versatile interior fittings and layouts is available. The operating specifications and the interior layout can both be customised.

Castors and legs

Can be fitted with castors or feet, or mounted on a plinth.

Stainles steel interior

The internal sides and bottom as well as shelf and drawer brackets and support rails are made of stainless steel.
